

60-705-43-ENG

Water-resistant medical pendant

Overview

The Panic Button is a water-resistant wireless device used for activating police, medical, or auxiliary alarms throughout the premises. When the panic button is pressed, the LED mounted under the front cover will blink and an alarm signal is transmitted. The status of the battery is sent in every transmission. The battery is field replaceable. The button has five adapters which easily fit onto the panic button. Using these adapters the panic button can be mounted on the wall, worn as a belt clip, as a watch, or as a pendant.

Standard Features

- Supplied with adapters to be mounted on a wall, worn as a belt clip, as a watch or as a pendant
- Compatible with 433 Mhz receivers and control panels
- Water-resistant
- Easy to use by elderly or disabled people
